Cleaner surfaces with
80% lower impact
on the **environment**

i-spraywash

Maintaining high cleaning and hygiene standards in bigger areas such as showers, restrooms and kitchens can be a struggle.

Operators have limited time and traditional methods can be expensive, difficult to master or heavy to work with.

i-spraywash is the only tablet-based cleaning system in the world.

The **i-spraywash** system is a plug & play spray gun with an integrated dosing feature. A special nozzle creates an active foam that really sticks to surfaces. All you need is a water hose and the right i-spraywash tab and you are ready to go

The operator doesn't have to think about how the system works, only where to spray.

Features

Designed for fast cleaning of large surfaces.

Ideal for any operator - lightweight & simple

Improved ergonomics

Clean 2-300 m² with just one tab

Save time and money

Real clean also means **real green**

Faster

Cleaning 1m² in just one second saves to 50% working time. Less is more. Faster foam coverage and less foam on the floor saves time when rinsing.

Cleaner

The special foam nozzle and tablets create an effective active foam that sticks to surfaces and even those hard to reach corners.

Greener

The **i-spraywash** saves up to 25% of chemicals and 50% of water compared to traditional foam cleaners. All **i-spraywash** tablets are biodegradable and eco-friendly and are developed with only the best active components, good for both the worker and the environment.

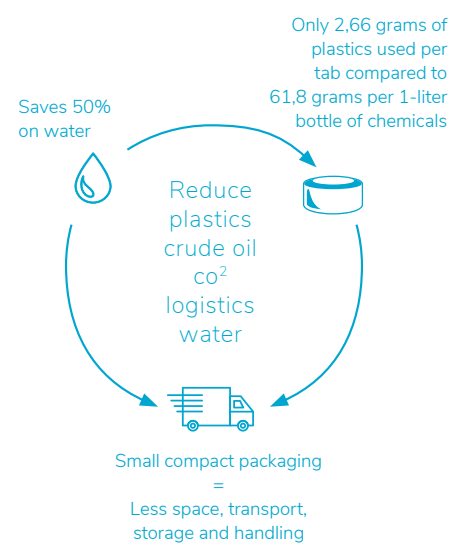

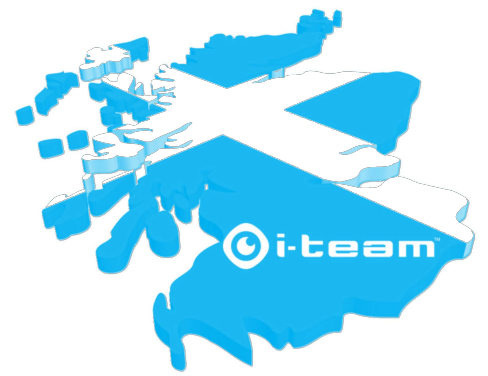

Safer

The **i-spraywash** is 2-3 times lighter than most liquid cleaning systems, reducing strain on the wrist, arm, shoulder and back of the operator. The concentrated tablets make sure you never over or under dose your chemicals. The system uses a color-coding system to organize your daily cleaning.

...and better for everyone!

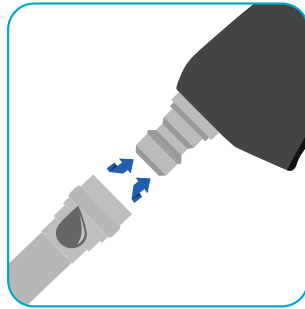

It has never been this easy, safe and effective to clean and disinfect! No more heavy lifting or transporting of liquid chemicals in concentrate or diluted form. The **i-spraywash** automatically dilutes and dispenses. All you have to do is to choose the right tablet for your current task.

Choose the right tablet

We offer a variety of 5 tablets for different cleaning and disinfection tasks.

Connect to water hose

Simply connect to a water hose with normal water pressure. Works with cold, lukewarm and warm water.

Integrated dosing

i-spraywash has a function to adjust chemical dilution. Just turn to adjust for the required output.

2 in 1, click-off-click-on

When you are done spraying foam, simply click-off the foam nozzle and click on the rinse nozzle and start rinsing.

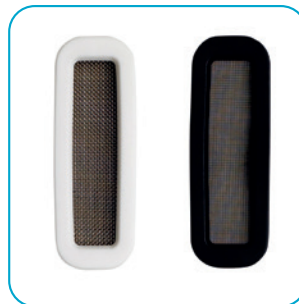

Color-coded cleaning

The **i-spraywash** concept includes color-coded tablet containers, tablet kits and equipment. Easily wall mounted for simple and safe storage.

Reduced shipping costs

1 concentrated tablet is equal to 1L liquid concentrate. Instead of 18 litres of concentrate, you will receive 18 tablets in a small, compact box. This reduces environmental impact by at least 80%. Additionally **i-spraywash** reduces your water usage by up to 50%.

Two foam filters

The **i-spraywash** comes with two foam filters. The white foam filter produces fast, fine and compact foam. The black foam filter creates an increased and more concentrated foam, designed for floor cleaning.

Maximum effect

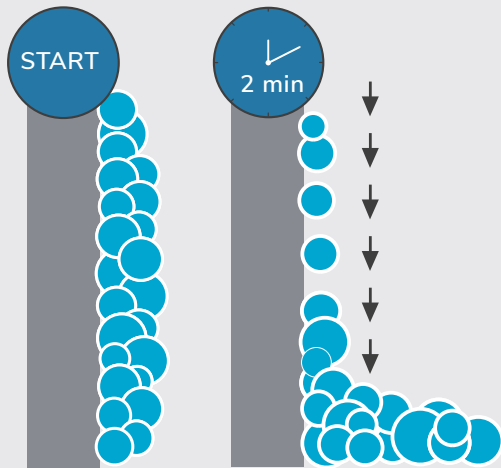

Combine the **i-spraywash** with the **i-scrub 21B** or the **i-mop** for an even deeper clean. Use the **i-fibre** range to finish the job.

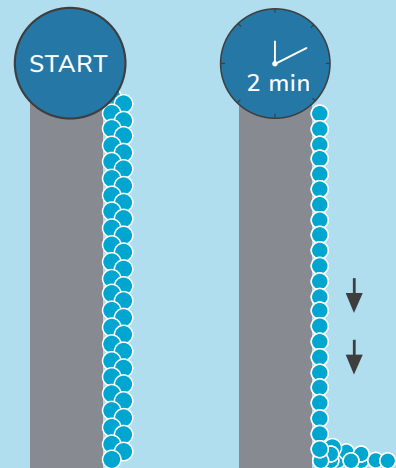

Foam that **sticks** around

When you apply a thin layer of foam to a wall with the **i-spraywash** it really sticks. This means less rinsing of heavy foam from the floor. Less water and chemicals give you a much better cleaning result and will save you time and water when rinsing.

One solution **numerous** applications

i-spraywash Tablets

The **SprayWash** tablets are developed and produced only for use in the **i-spraywash** system. We offer a variety of tablets for different cleaning and disinfection tasks including descaling, daily and heavy cleaning.

Our **ChlorTab Extra** and **DesTab** are among the most efficient disinfectants in the business and will increase hygiene standards.

CleaningTab 1

For periodic descaling of all surfaces that can withstand water, including walls, floors, tables, mirrors, equipment, machinery and inventory. Effective against limescale and to prevent limescale build-up.

pH: 1,5

CleaningTab 9

For daily and heavy cleaning of all surfaces that can withstand water, including walls, floors, tables, equipment, machinery and inventory. Effective against body fat, animal fat, vegetable oils, fats and dirt.

pH: 9,5

CleaningTab 12

For heavy cleaning on very dirty surfaces that can withstand water, including walls, floors, tables, equipment, machinery and inventory. Effective against body fat, animal fat, vegetable oils, fats and dirt.

pH: 12

DesTab

Active oxygen disinfection and cleaning of all surfaces that can withstand water, including walls, floors, tables, equipment, machinery and inventory. Effective against bacteria, viruses and fungi, biofilm and for odour control.

pH: 4,5

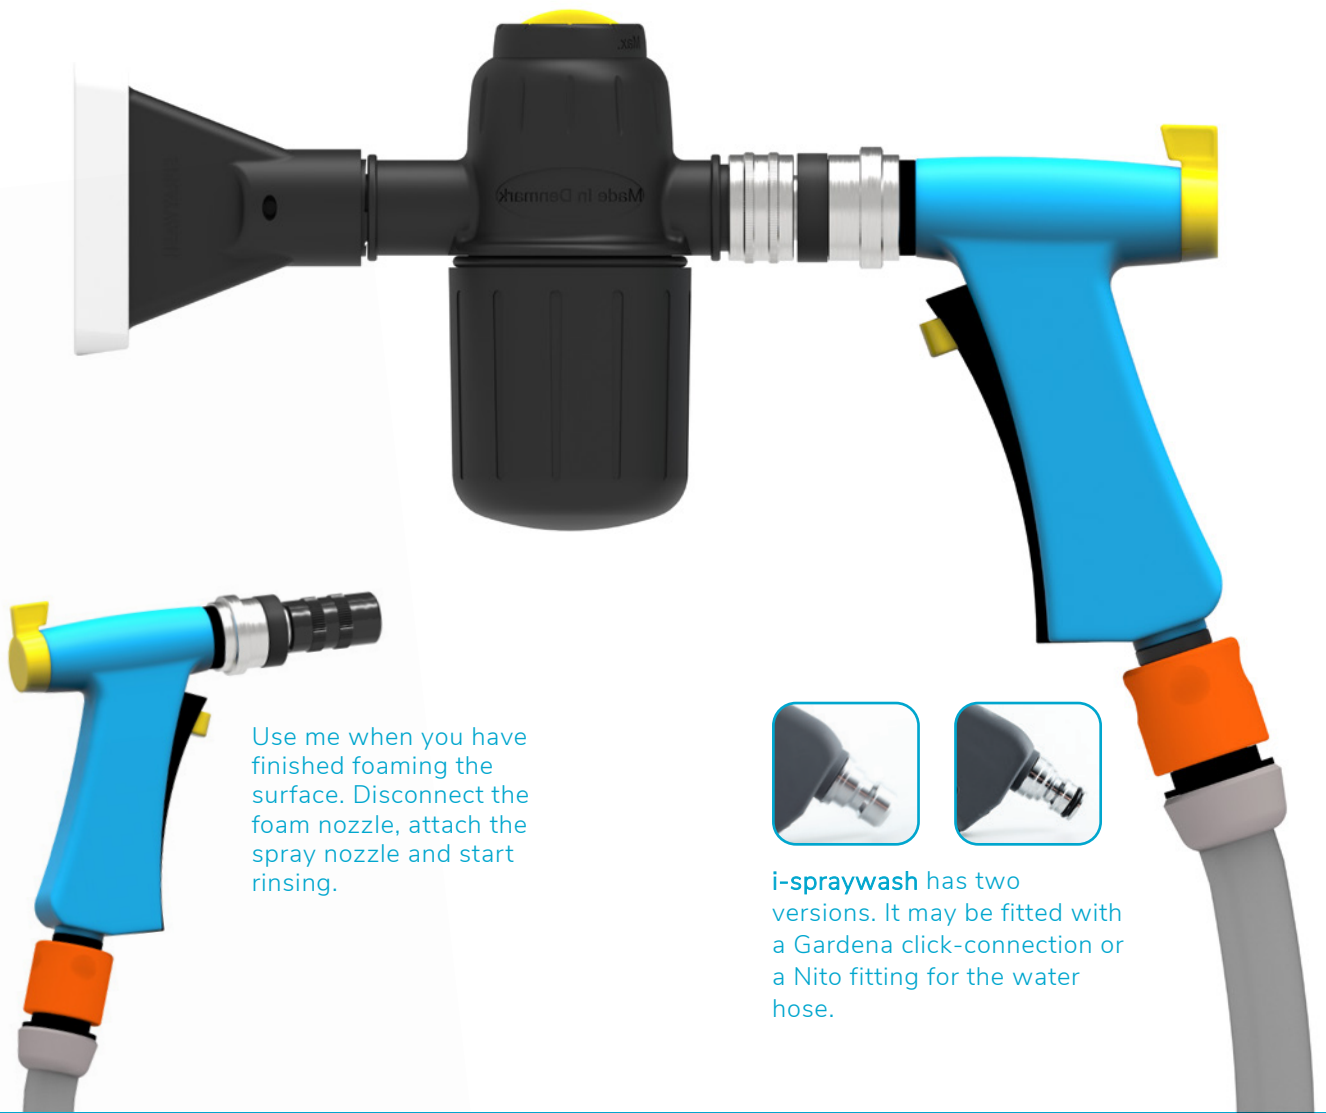

ChlorTab Extra

Chlorine disinfection and cleaning of all surfaces that can withstand water, including walls, floors, tables, equipment, machinery and inventory. Effective against bacteria, viruses, fungi, biofilm and as odour control.

pH: 6,0

Each box contains
18 tabs

Use me when you have finished foaming the surface. Disconnect the foam nozzle, attach the spray nozzle and start rinsing.

i-spraywash has two versions. It may be fitted with a Gardena click-connection or a Nito fitting for the water hose.

Technical specifications

Weight with foamsprayer	0,8 kg
Size with foamsprayer	34x19cm
Weight with rinse nozzle	0,4 kg
Size with rinse nozzle	15,5x16cm
Water pressure:	2-4,5 bar
Max. using temperature:	45 °
Min. using temperature:	5 °
