

i-drive

Opening new possibilities for large area cleaning

faster

cleaner

greener

safer

better

The best of both worlds

i-drive: large space specialist
imop lite: small space specialist

Benefits
Cleans large spaces faster
More time to focus on smaller, detailed work
Less water consumption compared to standard scrubbers
Clear front view while driving
Operator has time to rest while cleaning
Base-mounted lights for cleaning dark spaces

i-drive

The unique i-drive incorporates an on-board i-mop Lite, allowing the operator to step off the machine to clean smaller and more restricted areas.

With two sets of batteries, the i-drive is ready for work 24 hours a day, 7 days a week.

A turning radius of just 1.6m enables i-drive to operate in the tight aisles and corridors found in many large commercial environments, boosting productivity and enhancing cleaning operations.

Faster

Clean large, medium, and small areas in less time. Because of its small turning radius, the i-drive can turn in narrow aisles. You can also fill, refill the i-mop Lite easily from i-drive's fresh water tank, or empty waste solution from i-mop Lite into i-drive, saving valuable downtime and boosting productivity

Cleaner

The i-drive features an on-board i-mop Lite, allowing the operator to quickly step off the machine and clean smaller and more restricted areas. In short, the i-drive cleans your big spaces, while the i-mop Lite allows you to efficiently clean smaller spaces.

Greener

Thanks to the high mechanical power of the i-drive, you will use less water and reduced chemicals for cleaning.

Safer

The i-drive is equipped with a loading ramp for i-mop Lite and adjustable footrest for better ergonomics. Front & rear safety lights ensure high visibility and the base-mounted lights illuminate the floor for cleaning in dark spaces. Smart design ensures a clear view while driving and the squeegee and brushes automatically retract when reversing.

...and better for everyone

i-drive covers the cleaning needs of supermarkets, stadiums, or any building with mixed smaller and larger spaces. Operators can rest while working to reduce fatigue and will achieve more cleaning in less time!

Sliding Battery tray

The battery rack has space for six i-power 14 batteries offering a run-time of 80 minutes.

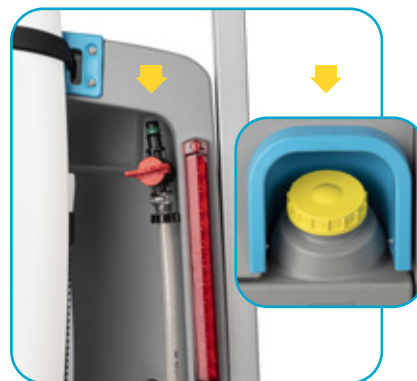

To change the batteries simply pull out the rack and slide out the batteries. By changing and charging batteries, 24/7 driving is possible.

Easy operation

No PhD required to operate the i-drive, we have done all the programming for you.

Self-explanatory icons and clear control panel make this one easy ride.

Filling stations

Fill, refill and empty the i-mop Lite easily. No need to return to the cleaning cupboard, get fresh water from the i-drive, or empty the recovery tank into the i-drive.

In reverse

The squeegee and brushes retract automatically for reverse driving

Adjustable pedal

Innovative pedal design meets the driver's individual requirements.

Ramp

The ramp can be rapidly assembled for safe, easy and ergonomic loading and unloading of the i-mop Lite.

Available accessories

- Polyurethane squeegee blades
- Extra battery set (6)
- Brushes / Pads
 - PPN
 - Moquette
 - Mischia
 - Tynex
 - Abrasive pads:
Black, green & red
(pad driver needed)

VS.1-20201221

Working width	610 mm
Theoretical performance	2745 m ² per hour
Practical performance	1400 m ² per hour
Pad pressure	25 kg
Pad speed	175 rpm
Typical Operational Weight (TOW)	208 kg*
Gross Vehicle Weight (GVW)	349 kg**
Driving speed	4.5 km/h
Solution tank volume	58 L
Recovery tank volume	55 L
Detergent tank volume	5.5 L
Batteries	i-power 14: 25.2 V, 14 Ah
Power	24 V
Runtime up to	80 min (24/7 with extra set of batteries)
Dimensions (l x w)	1.460 mm x 600 mm
Turning circle diameter	1.660 mm

* i-drive + 6 batteries + imop Lite + chemical tank

** i-drive + 6 batteries + imop Lite + chemical tank full + solution tank full + operator (75kg)
