Streamline® Overspan Pole – Lightweight, Durable, and Versatile

The Streamline® Overspan Pole is the ultimate solution for cleaning hard-to-reach canopies, shelters, rooflights and many more applications, providing a safe and efficient way to access areas that standard straight poles can't. Designed with advanced OVA8® zero spin pole technology, this pole ensures effortless manoeuvrability while delivering a powerful cleaning performance. Made from 100% professional carbon fibre, the Streamline® Overspan is lightweight yet durable, built for maximum strength and longevity.

Key features include an adjustable angle joint for precise control and the flexibility to clean at various angles. The fully adjustable telescopic height and reach provide versatility, with a maximum height designed to tackle glass shelters and structures from the safety of the ground. Equipped with a 10" medium Hi-Lo waterfed brush, this pole delivers efficient cleaning power, while the Streamline® quick release pencil jets provide a consistent water flow for superior results.

The Streamline® Overspan Pole also includes Integral Flexi-5™ water fed tubing and is fitted with a Q21 male adaptor, making it compatible with most waterfed systems. Its folding design allows for easy storage and transportation, making it a convenient addition to any professional cleaning setup.
