

WINNER[®] 38 E

With a cleaning width of 385 mm and two big tanks (16/22 litres) the Winner 38E is the ideal machine for long operating periods without any breaks. Champion of convenience and efficiency, this is an electrically operated, ergonomically designed, compact scrubber drier - lightweight and easy to transport due to the fold down handle. The Winner 38E benefits from well positioned, intuitive controls, adjustable handle, large dimensioned cap (for inspection and cleaning of the recovery tank) - with built-in level sensor and easily accessible vacuum turbine. The floating brush head is centrally positioned for ease of use and, due its small turning circle and maneuverability, the Winner gets into small areas with ease. The Winner 38E is electrically powered (220V) and comes equipped with a 15m cable as standard.
